

Desktop View

On landing of the page all you will be able to see is the logo image and welcome text.

Press on the sing in button to enter the details

Alert box pops up to ask the user for details

Press Enter and the logo image and initial text disappears.

Welcome <username> appears at the top of the page

Following the instructions on the page

The user can pick from 4 designs

Once the design is picked the image in enlarged and features section shows what the user can modify

Once the button Edit pressed the user is presented with a preview of the card and text input field where they can modify their greeting

The user will be presented with a selection of background colours

The user will be able to add their own picture by accessing the camera

After the user is happy with design they can click the button Send Your Card

That will take them to the area where they can fill in their details and recipient details and finally send the card!

Once the user presses the button send the alert appears with message "Thank you for using our services, see you soon again!"

Then the page goes back to initial screen
